**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13-27, drawn to a printer with a control unit for sensing a connection to a computer and updating a printer driver to the computer or an imaging apparatus with a communication port accessible from outside of a secured compartment, classified in class 347, subclass 50.
- II. Claims 1-12, 28, and 29, drawn to methods for exchanging and/or recycling a printer/imaging apparatus, classified in class 399, subclass 109.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of use may be applied to a self-contained or handheld printer/imaging apparatus that does not communicate with an external device. In addition, the product as claimed may be of a disposable type rather than be employed in a recycling/exchanging process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2853

A telephone call was made to Mr. Ronald Aust (Reg. No. 36,735) on January 14, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
